**Company Name** : Computium Sdn. Bhd.  
**Position Title** : Senior Technical Manager (1996)  
**Specialization** : Point-of Sales system  
Inventory / Serial Number Tracking System  
Point-of Sales and Handphone Spare Part Tracking System  
Financial System and Job Tracking Workflow system  
**Date Joined** : 1996 - 1998

#### **RESPONSIBILITIES:**

---

Primarily involved in systems design, customer liaison and a role in development. Most projects typically involve Visual Basic as the front-end with SQL or Access as backend database. KB Lee was actively involved in a number of turnkey projects ranging from Manufacturing to Point-of-Sale. This was possible with a small number of robust, in-house solutions that was designed with high flexibility on the requirement list. After the initial investment in development effort, further projects were then focused on customers' requirements and customizations of existing solutions. Inventory tracking and report generation being the key features of these solutions. Upon completion of each project, provided technical support as well as end-user training for each solution delivered or products (Platinum, Traverse) supported. Occasionally assisted in on-site implementation of networking infrastructures and windows servers.

#### **ACCOMPLISHMENT**

- Implemented Platinum Accounting Software for various sectors
- Success in develop our in-house Financial System
- Point-of Sales system for Estee Lauder
- Integrated Inventory Tracking System for APM Sdn Bhd
- Point-of Sales and Handphone Spare Part Tracking System for Wywy Group Sdn Bhd
- Integrated Job Tracking Workflow System with Financial for KT Technology Sdn Bhd

**Company Name** : Dataprep Open Systems Sdn. Bhd  
**Position Title** : **Systems Support Manager**  
**Specialization** : Insurance Broker System  
Customised Platinum Financial System for Dataprep Subsidiary Companies.  
**Date Joined** : 1993-1996

#### **RESPONSIBILITIES:**

Managed a group to develop the Insurance Brokering System. Lee had to liaise with multiple insurance companies to set common specifications. An IT solution was then developed for these companies, who could then submit uniform status reports to Bank Negara (Federal Treasury). Visual Basic 3.0 and SQL database was used to develop this particular application as an enhancement to Platinum's current set of features in order to meet those specifications. Followed up with customer support and feedback. He was also responsible for administering the company's internal networks and devised office automation processes when necessary. Actively involved in training and fine-tuning of applications developed by Dataprep Open Systems.
